### Environmental Policy

The company policy of **Splashdown Event Services Pty Ltd** is designed to ensure minimum affect on venues, and the general environment by its activities.

Where ever possible procedures are refined and updated to incorporate the best in environmentally-friendly assets, and to minimise unnecessary transport and product use.

### Site access

Splashdown investigates all venues to ensure easy access for the delivery and removal of bathrooms. Event planners are consulted, and are an integral part of venue protection.

### Environmental advantages

- Splashdown Event Services utilises in all its units, a fresh flushing toilet using a maximum of 500ml of water per flush, compared to the industry average of 3-6 litres. This enables a much lower consumption of water on site, a real advantage where water usage is an issue.
- The use of a spring loaded return tap minimises water usage — this is a feature in all our toilet blocks. These water saving devices mean that less pump outs are required per event, thus reducing truck visits and diesel consumption.
- Odour in waste tanks is minimised by the use of an ecologically friendly product that does not affect sewers or septic systems.
- Splashdown Event Services usually provides toilet paper with toilet blocks. Where ever possible a recycled product is used.

## Why you should use Splashdown Event Services

- You deal with the principals of the company
- Quality fit-outs in all units
- Environmentally superior units — microflush system reduces water usage
- High capacity usage — unit services 3,000 to 3,500 uses
- Safety — low to the ground, single easy access step
- Hire and servicing available

# BESPOKE LUXURY BATHROOM MODULES

## Splashdown Event Services has Australia's largest range of portable luxury bathroom facilities.

Our Bespoke Luxury Bathroom Modules offer the ultimate experience in flexibility and design using the latest in environmentally superior marine vacuum technology which is currently used in luxury cruise ships and commercial airlines.

The modules come in a range of three styles: a stand-alone toilet cubicle, a 3 urinal wall panel and also a stand-alone vanity. The uniqueness of each module is the width. Based on multiples of 0.9m, they have the ability to fold up into trolley sized components. This allows the modules to be installed in any building with a standard doorway entrance. With that in mind and your patron male/female ratio, it is possible to install the modules in any number of configurations to suit the event design and venue. This provides the event manager with the ability to showcase their creativity using custom design layouts for patrons and potential sponsors, including powder rooms and display areas.

You can now access the dream venue you have always wanted – double storey marquees, heritage buildings, convention centres, private homes and many more exciting but difficult to access prospective venues.

Luxury disabled/accessible module

# VACUUM EVENT TOILETS

**Splashdown Event Services introduces Australia's first general admission vacuum event toilets. Environmentally friendly and with improved hygiene, these toilets will add prestige and profitability to your event.**

## Customer satisfaction improves profitability

- Cleaner toilets improve food and beverage sales
- Patrons have no need to find alternatives or shorten their time at the event
- Allows promoters to demand premium prices in VIP areas and food and beverage areas
- Unlimited waste capacity when connected to sewer
- Hand wash facilities separated to speed up time in the cubicles as well as reducing water spillage
- Waste management is away from patrons for improved safety
- No service trucks in public areas
- No odour

## Flexible configuration

- 3 pan configuration allows for small to large groupings of units
- Ability to operate on uneven ground, and in complicated layouts

## Environmental advantages

- Use of air with minimum amounts of water (600ml) to move waste – reducing waste total by up to 80%
- Negates the use of trucks and diesel by ability to connect directly to sewer
- Reduces waste treatment times with primary treatment done by the vacuum process
- Better sanitary results by improving hygiene
- Efficient transport system with units being able to fold and stack, reducing transport costs
- No chemicals

## PICNIC TABLES FOR EVENTS

These picnic-style folding tables are designed to seat a maximum of eight average sized adults.

EventTable has lots to offer as professional seating:

- Simple, strong and safe design
- Stable on all surfaces – even on wet grass
- Seats eight average sized adults
- Easy access with comfortable seating
- Elegant design, attractive colour
- Wheelchair-friendly
- Easy to assemble
- Easy to clean
- Wide enough for two plates

Visit [www.eventtable.com.au](http://www.eventtable.com.au) to find out more.

### EventTable specifications:

The EventTable's width and length remain the same when set up or taken down.

The benches are 5cm shorter than the table top, which ensures that the cheeks don't get stuck if the tables are connected lengthways.

If necessary the EventTable can be easily dismantled, splitting the unit into five separate parts for transport.

<b>L x W</b>	200 x 135 cm
<b>Table top</b>	205 x 60 cm
<b>Bench</b>	200 x 24 cm
<b>Table top height</b>	75 cm
<b>Bench height</b>	45 cm
<b>Stacking height</b>	10 cm
<b>Weight</b>	ca. 45 kg

# LUXURY BATHROOMS

**Our Luxury bathrooms are designed to provide outdoor facilities adjacent to marquees, trade displays, catering precincts and much more.**

We can provide these bathrooms to offer the best possible level of service, mindful of patron male and female ratios. All bathrooms have large vanity areas with well appointed fittings and mirrors.

The Luxury bathrooms are very well suited to weddings and private and/or corporate functions when you want comfort and something a bit more appealing to the eye.

Event managers can choose between our standard supply of paper hand towels and soap, or an upgrade to cloth hand towels and designer soaps to suit the occasion.

Luxury bathrooms can be delivered by tilt tray or crane truck. All bathrooms connect to mains water and power (waste is self contained). For areas with no mains water, remote tanks can be supplied. Lighting requires a 15 amp single phase.

## Luxury bathroom options:

- Male bathroom, female bathroom, combination bathroom, duo toilet trailer and disabled/accessible toilet.
- Attendants may be provided in black and white uniforms.

# CORPORATE BATHROOMS

**Our Corporate bathrooms are best suited to VIP areas at large events, production back of house, product launches and weddings.**

These bathrooms offer a quality fit out at reasonable prices.

The Corporate bathroom provides vanity areas with large mirrors and lighting, soaps and paper hand towels, which may be upgraded to cloth hand towels and designer soaps.

Corporate bathrooms can be delivered by tilt tray or crane truck. All bathrooms connect to mains water and power (waste is self contained). For areas with no mains water, remote tanks can be supplied. Lighting requires a 15 amp single phase.

## Corporate bathroom options:

- Male bathroom, female bathroom, combination bathroom, duo toilet trailer and disabled/accessible toilet.
- Attendants may be provided in black and white uniforms.

## LUXURY BATHROOMS

<b>Uses</b>	Max 100
<b>Requires</b>	Fresh water in the holding tank
<b>Skin</b>	Plastic
<b>Operation</b>	Hand pump
<b>Height</b>	2.75 metre
<b>Size</b>	1.2 metre x 1.2 metre
<b>Lighting</b>	LED lighting
<b>Inclusions</b>	1 pan, liquid soap, multiple toilet paper holders

# STANDARD BATHROOMS

## 16 PAN UNITS AND URINAL UNITS

16 pan unisex

**Standard/General admission bathrooms are designed to service large crowds attending sporting and music events.**

All Splashdown bathrooms use 500ml fresh flush with spring loaded taps to offer maximum water and waste savings. Each building has lighting for safety and hand wash facilities with soap dispensers to ensure the highest possible hygiene standards.

Waste tanks on the 16 pan units have a 4000 L capacity – up to 2800 uses. Single units have up to 200 uses. This high capacity reduces servicing frequencies for waste trucks. This is extremely important in minimising the impact of vehicles on patrons and the environment.

### Standard bathroom options:

- 16 pan unisex building
- 16 person urinal building
- Disabled/accessible toilets
- Single toilets.

16 pan unisex

16 person urinal building

16 person urinal

## OTHER BATHROOM OPTIONS

LUXURY DUO TRAILER

SINGLE UNIT – FRESH FLUSH

LUXURY DISABLED/ACCESSIBLE TOILETS

STANDARD DISABLED/ACCESSIBLE TOILETS

# SHOWERS

## 10 SHOWER UNIT

<b>Size</b>	6 metres x 3 metres
<b>Height</b>	3.2 metres
<b>Weight</b>	2500 kg unloaded
<b>Power</b>	10amp GPO outlet (single phase)
<b>Waste</b>	To sewer or remote tanks (available)
<b>Water</b>	Garden tap/remote tanks available
<b>Hot water</b>	Gas LPG

## 6 PERSON SHOWER UNIT

<b>Height</b>	2.8 metres
<b>Weight</b>	600 kg
<b>Size</b>	4 x 2.4 metres
<b>Power</b>	15amp single phase outlet
<b>Waste</b>	To sewer or remote tanks (available)
<b>Hot water</b>	1 x 45kg gas bottle included

## LUXURY DISABLED SHOWER UNIT

<b>Height</b>	2.8 metres
<b>Weight</b>	1500 kg
<b>Size</b>	3 x 2.2 metres
<b>Power</b>	15amp single phase outlet
<b>Waste</b>	To sewer or remote tanks (available)
<b>Hot water</b>	50 L electric hot water system

### OTHER OPTIONS:

Duo shower trailer  
Single shower

# HYDRATION UNITS

Specially designed hydration stations for large events where access to fresh water for patrons is required. Units range from 12 to 36 drinking fountains and can be hooked to remote tanks or town water supply.

- **Option 1**  
Stand alone 28 x bubblers and 8 x taps. Can either connect to mains water or remote tanks
- **Option 2**  
Stand alone 20 x bubblers and 8 x taps. Can either connect to mains water or remote tanks
- **Option 3**  
Trailer 8 x bubbler and 4 x taps. Has its own 600 ltr holding tank within. Can connect to mains water or remote tanks.

28 bubbler and 8 tap – connects to mains or remote tanks

Option 1: 28 bubbler and 8 tap – connects to mains or remote tanks

Option 2: 20 bubbler and 8 tap – connects to mains or remote tanks

Option 3: 8 bubbler and 4 tap hydration trailer with 600 L holding tank. Can also connect to mains water.

Also: Eight tap bottle filling stand – connects to mains water or remote tanks

# HAND WASHING AND CATERING SINKS/POTWASH

**Splashdown can also provide hand wash stations and kitchen catering sinks/potwash.**

Each hand wash station contains two sinks and a warm water temperature of 40-42° C. The hand wash stations are self contained and need only be hooked to electricity.

Splashdown's kitchen catering sinks are made from heavy duty steel and consist of two 45 litre sinks with a separate hand wash sink. Each sink contains a vortex pump to pump to sewer or waste tank. They can be connected to mains water, electricity and waste or to remote tanks.

All kitchen catering sinks come with 50 L electric hot water system.

Corporate 6 basin hand wash – connect to mains water and waste supply

Eight tap water station with soap dispensers – cold water only

Hygienus handwash stand – contains soap and paper hand towels

Two bowl Polyjohn handwash station – contains soap and paper hand towels

Two bowl plastic catering sink/potwash

Two bowl stainless steel catering sink/potwash

## TICKET BOOTHS

Customised ticket booths with 4 windows

- Air conditioned
- 4m wide x 2m deep x 4 m high

## WATER TANKS

Tanks for drinking (potable) water

- Available from 1000 litres to 5000 litres.
- Tanks can be fitted with mains pressure pumps to operate toilets or showers.
- For water conservation, tanks can be used for A1 recycled water (toilets may need modification).

## WASTE TANKS

Waste tanks (grey water only) are available in 1,000 litres to 5,000 litre units and are to be used in conjunction with sinks and hand wash facilities.

## KENNY'S PLANNING TIPS

Useful tips to help you determine the toilets and showers you require for your event:

### Choose the type of unit that best suits your event:

- Standard, Corporate or Luxury

### Determine the number of units and the level of service required by considering the following:

- The duration of the event
- Expected audience, food and fluid consumption (especially alcohol)
- What are the promoter's expectations in regards to bar and food revenue and the impact toilet use will have on these revenues?
- Are there adequate provisions during intervals and breaks in performance?
- Are there event-related temporary camp sites?
- Provision of suitable facilities for children, the elderly or infirm attending, who may take longer to use the facility

### Try our Planning Calculator

Visit [www.splashdowneventservices.com.au/contact-us/](http://www.splashdowneventservices.com.au/contact-us/) to help you estimate the facilities you need for your event.

Or call us on 02 4626 5337

- Are facilities inside a fenced venue, or are they servicing a walk through event?
- Expected weather conditions, temperature and shaded areas
- Non-event areas such as back of house, production, car parking, transport hubs and security
- History of other events at this venue
- Do you require a DA from local government?
- Do you require a waste management plan?

### Site amenities

- What are the existing amenities on site?
- Is there water and sewer on site? Water pressure will fall during an event so will it be adequate?
- Is there access for waste trucks?
- Does the venue have a waste management plan?

### Useful references – for large events
